You will need to use geometric constraints to limit the number of parametric dimensions that are needed. Test your results by scaling the object up or down. If all of the parametric equations are written correctly, the object should increase or decrease in size and maintain its geometric proportions.

Activity 2.3.2: Parametric Constraints Answer Key

related to parametric operations in CAD, and explains how geometric constraint solving interacts with parametric CAD. Then the bulk of the paper addresses advances in geometric constraint solving techniques, which are discussed in two major sections: In Section 3, a broad range of approaches to constraint solving is discussed.
