" Writing the Economic Survey with the staff of the Economic Division and Team CEA has been one of the most rewarding and thrilling experiences as Chief Economic Adviser, and indeed of my professional life. The Indian economy is infinitely susceptible to analysis: even scores of more Surveys will only touch the tip of its richness and complexity.

Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

Mathematical analysis is the branch of mathematics dealing with limits and related theories, such as differentiation, integration, measure, infinite series, and analytic functions.. These theories are usually studied in the context of real and complex numbers and functions. Analysis evolved from calculus, which involves the elementary concepts and techniques of analysis.
