G-code (also RS-274), which has many variants, is the common name for the most widely used numerical control (NC) programming language. It is used mainly in computer-aided manufacturing to control automated machine tools.. G-code is a language in which people tell computerized machine tools how to make something. The "how" is defined by g-code instructions provided to a machine controller ...

The bombe (UK: / b ɛ m b /) is an electro-mechanical device used by British cryptologists to help decipher German Enigma-machine-encrypted secret messages during World War II. The US Navy and US Army later produced their own machines to the same functional specification, albeit engineered differently both from each other and from the British Bombe itself.. The initial design of the bombe was ...

I had the same problem on printing a PDF file. There's a nuget package called Spire.Pdf that's very simple to use. The free version has a limit of 10 pages although, however, in my case it was the best solution once I don't want to depend on Adobe Reader and I don't want to install any other components.

I know this question is old but I thought I would share this as I could not find anything similar. I wanted to create my views/models as normal using Razor and have them rendered as Pdfs.. This way I had control over the pdf presentation using standard html output rather than figuring out how to layout the document using iTextSharp.
