An electronic health record (EHR), or electronic medical record (EMR), is the systematized collection of patient and population electronically-stored health information in a digital format. These records can be shared across different health care settings. Records are shared through network-connected, enterprise-wide information systems or other information networks and exchanges.

Electronic health record - Wikipedia

Transfer of autologous dendritic cells (DCs) has been investigated as a method of boosting T cell responses in therapeutic vaccines for several diseases. Tanyi et al . report the findings of a clinical study involving recurrent ovarian cancer patients. Patient DCs were pulsed with oxidized tumor lysate before transfer and given alone or in combination with immunomodulatory drugs.
