What OOP is NOT. As a first step I shall debunk some of the answers that I have seen. In compiling the following list I picked out those descriptions which are not actually unique to OOP as those features which already exist in non-OO languages cannot be used to differentiate between the two.

What is Object Oriented Programming (OOP)? - Tony Marston

Go (often referred to as Golang) is a programming language designed by Google engineers Robert Griesemer, Rob Pike, and Ken Thompson. Go is a statically typed, compiled language in the tradition of C, with the added benefits of memory safety, garbage collection, structural typing, and CSP-style concurrency. The compiler, tools, and source code are all free and open source.
