Call for Papers. Download the call for papers in pdf format.. Having been established in 1999, the Cryptographic Hardware and Embedded Systems (CHES) conference is the premier venue for research on both design and analysis of cryptographic hardware and software implementations.

CHES 2018 “ Call for Papers

Keywords: Post-quantum cryptography, standard lattices, Frodo, KEM, FPGA, microcontroller, embedded security, hardware security Abstract Lattice-based cryptography is one of the most promising candidates being considered to replace current public-key systems in the era of quantum computing.

Standard Lattice-Based Key Encapsulation on Embedded

PRESENT is intended to be used in situations where low-power consumption and high chip efficiency is desired. The International Organization for Standardization and the International Electrotechnical Commission included PRESENT in the new international standard for lightweight cryptographic methods.
