Web development is the work involved in developing a web site for the Internet (World Wide Web) or an intranet (a private network). Web development can range from developing a simple single static page of plain text to complex web-based internet applications (web apps) electronic businesses, and social network services.A more comprehensive list of tasks to which web development commonly refers ...

Web development - Wikipedia

A programming language's surface form is known as its syntax. Most programming languages are purely textual; they use sequences of text including words, numbers, and punctuation, much like written natural languages.

Programming language - Wikipedia

I'm using Ghostscript to convert my PDF files to JPEGs with Ghostscript which works great. For my output images I'm using %03d in the file name, so the file names come out 001, 002... and so on according to the page numbers.. But i want in some case the numbers to start from an higher number.
