Answer Key Momentum And Conservation Of Momentum

Moving magnets make electricity. Because electricity and magnetism are linked we can make motors and generators. Something turns the generator (does work) causing magnets to move, which creates electricity. Dams, cars, and power plants all produce electricity in this way. Work in (air): electricity out. Generators generate electricity.

more energy uses more current. A louder radio pulls (uses) more amps. Devices that use more energy, use more current. More current Less current Voltage Water falls due to gravitational potential energy (E_p). Likewise, current moves because of electrical potential energy given to electrons by voltage. There must be a change (difference)
