Dashboards visualize a consolidated set data for a certain purpose which enables users to see what is happening and to initiate actions. Dashboards can be used by governments to support their decision-making and policy processes or to communicate and interact with the public.

Data science empowering the public: Data-driven dashboards

Innovation can be defined simply as a "new idea, device or method". However, innovation is often also viewed [by whom?] as the application of better solutions that meet new requirements, unarticulated needs, or existing market needs. Such innovation takes place through the provision of more-effective products, processes, services, technologies, or business models that are made available to ...

Innovation - Wikipedia

By "Big Data Collection" we mean a collection of techniques for ingesting and integrating Big Data, as well as using cloud infrastructure to store it (i.e., "collecting" data into a hosted repository)â€

Data Science for Tackling the Challenges of Big Data

The Data Science Salon is a destination conference which brings together specialists face-to-face to educate each other, illuminate best practices, and innovate new solutions in a casual atmosphere with food, drinks, and entertainment.

Los Angeles 9/18 - DataScience.SALON

Big data is a term used to refer to the study and applications of data sets that are too complex for traditional data-processing application software to adequately deal with. Big data challenges include capturing data, data storage, data analysis, search, sharing, transfer, visualization, querying, updating, information privacy and data source. Big data was originally associated with three key ...
