A sense is a physiological capacity of organisms that provides data for perception. The senses and their operation, classification, and theory are overlapping topics studied by a variety of fields, most notably neuroscience, cognitive psychology (or cognitive science), and philosophy of perception. The nervous system has a specific sensory nervous system, and a sense organ, or sensor, dedicated ...

Personification is a figurative language technique where an object or idea is given human characteristics or qualities. In other words, using our language, we make an object or idea do something that usually is only done by people. With personification speakers and writers make the object or idea like a person and, hence, they personify it.
