You can filter your list of tables in SQL Server Management Studio by doing the following (below). This is especially useful if you have lots of related tables and your only interested in a particular set of them e.g. every table with "user" in the table name.

Developer Tip of the Day: Filtering tables in SQL Server

Hi, This post is very useful for the development purpose. I would like to ask a query in this regard. As per the specification document [MS-ASCMD].pdf, using sync command [2.2.1.19.1.6 Add] we can use the "Add" operation to add one item from client to the server.

Digging Into The Exchange ActiveSync Protocol

The following tables compare general and technical information for several packet analyzer software utilities, also known as network analyzers or packet sniffers. Please see the individual products' articles for further information.

A packet analyzer (also known as a packet sniffer) is a computer program or piece of computer hardware that can intercept and log traffic that passes over a digital network or part of a network. Packet capture is the process of intercepting and logging traffic. As data streams flow across the network, the sniffer captures each packet and, if needed, decodes the packet's raw data, showing the ...
