CORMIX is a USEPA-supported mixing zone model and decision support system for environmental impact assessment of regulatory mixing zones resulting from continuous point source discharges. The system emphasizes the role of boundary interaction to predict steady-state mixing behavior and plume geometry. The CORMIX methodology contains systems to model single-port, multiport diffuser discharges ...

The aim of this paper is to enhance understanding of how the resilience of water, sanitation and hygiene (WASH) systems to hazards can be improved.

Strategies for building resilience to hazards in water

The decision-making paradox relates to decision-making and the quest for determining reliable decision-making methods. It was first described in 1989, and has been recognized in the related literature as a fundamental paradox in multi-criteria decision analysis (MCDA), multi-criteria decision making (MCDM) and decision analysis since then.

What is Asset Management? Asset management is the management of the physical components of a

drinking water or wastewater system and can include: pipe, valves, tanks, pumps, wells, hydrants, treatment facilities, and any other

Asset Management Guidance and Best Practices

A body of water, such as a river, canal or lake, is navigable if it is deep, wide and slow enough for a vessel to pass or walk. Preferably there are few obstructions such as rocks or trees to avoid. Bridges must have sufficient clearance. High water speed may make a channel unnavigable. Waters may be unnavigable because of ice, particularly in winter.

Navigability - Wikipedia

There are a number of public and private regional plans that guide decision-making in the greater Madison region, which can be found here. Capital Area Regional Planning Commission Planning
