DEPRESSION - WHO

Exercise (training) in the treatment of depression and anxiety disorders The early literature on exercise as a treatment for depression and anxiety disorders was positive.

Physical activity, exercise, depression and anxiety disorders

Management of depression may involve a number of different therapies: medications, behavior therapy, and medical devices. Major depressive disorder, often referred to simply as "depression", is diagnosed more frequently in developed countries, where up to 20% of the population is affected at some stage of their lives. According to WHO (World Health Organization), depression is currently fourth ...
