Science Chemistry and biochemistry. Chemical synthesis, the execution of chemical reactions to form a more complex molecule from chemical precursors . Organic synthesis, the chemical synthesis of organic compounds . Total synthesis, the complete organic synthesis of complex organic compounds, usually without the aid of biological processes; Convergent synthesis or linear synthesis, a strategy ...

Efficient photocatalytic hydrogen generation in a suspension system requires a sophisticated nano-device that combines a photon absorber with effective redox catalysts. This study demonstrates an innovative molecular linking strategy for fabricating photocatalytic materials that allow effective charge separa

Granular synthesis is a basic sound synthesis method that operates on the microsecond time scale.

### **Granular synthesis - Wikipedia**

One•two punch: An isomerically pure bis•allylic bis•boronate reagent was synthesized and applied in the catalytic enantioselective single allyl transfer to aldehydes. The same reagent could also be converted into the more reactive bis•borinic species to allow the direct two•fold allyl transfer to two aldehydes.
