Computer-aided design (CAD) is the use of computer systems (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files ...

Computer-aided architectural design (CAAD) software programs are the repository of accurate and comprehensive records of buildings and are used by architects and architectural companies. The first program [which?] was installed back in the 1960s, to help architects save time instead of drawing their blueprints. Computer-aided design also known as CAD was originally the type of program that ...

1.. IntroductionThe discovery of living anionic polymerization by Michael Szwarc had a tremendous effect on polymer science , .His work facilitated major developments in both synthetic polymer chemistry and polymer physics as it opened an avenue to the production of well-defined polymers with precisely designed molecular architectures and nano-structured morphologies , , , , , , , , .

Controlled/living radical polymerization: Features

A first course in computer graphics hardware and software. Topics include graphics hardware, microcomputer graphics, presentation and business graphics, graphics for artists, computer mapping, CAD/CAM (drafting and environmental applications), animation, 3-dimensional graphics and desktop publishing.
