in the biomass volume, and hence in carbonate deposition. Thus, variations in sedimentation rates are expected as a response to short-time (seasonal, pluriannual) climate changes (Vaázquez-Urbez et al., 2009). Spatial variations result from differences in latitude and altitude (Pentecost and Zhang, 2002; Pentecost, 2005).

Developments In Sedimentology Volume 17 Sedimentary

Sedimentology is closely linked to stratigraphy, the study of the physical and temporal relationships between rock layers or strata. The premise that the processes affecting the earth today are the same as in the past is the basis for determining how sedimentary features in the rock record were formed.
