11. Bioavailability and toxicity of contaminant mixtures to soil biota M. Megharaj and R. Naidu 233 12. Bioavailability in soil: the role of invertebrate behaviour J. Roembke 245 13. Relationship between biochemical activity and metal concentration in soil amended with sewage sludge Tom W. Speir 261 D: Bioavailability of nutrients and agrichemicals 14.

Developments in Soil Science – Volume 32

tendency in the present fertilizer era to place less emphasis on soil organic matter as a factor in plant nutrition. The present availability of abundant commercial nitrogen does not, however, make soil organic matter any the less valuable; nitrogen acts as a supplement and is, in fact, the most important constituent of humus.
