The Rasch model, named after Georg Rasch, is a family of psychometric models for creating measurements from categorical data, such as answers to questions on a reading assessment or questionnaire responses, as a function of the trade-off between (a) the respondent's abilities, attitudes, or personality traits and (b) the item difficulty. For example, they may be used to estimate a student's ...

Issues What is forecast verification? If we take the term forecast to mean a prediction of the future state (of the weather, stock market prices, or whatever), then forecast verification is the process of assessing the quality of a forecast.. The forecast is compared, or verified, against a corresponding observation of what actually occurred, or some good estimate of the true outcome.

Hello, Thanks so much for the information. My question is: is it possible/ does it make sense to calculate fleiss's kappa for one subject. So for example 18 raters, with yes/no answers, for one question.

Fleiss' Kappa | Real Statistics Using Excel

Mammals are the vertebrates within the class Mammalia (/ m ˈæ m ə ˈeɪ ə l i ˈi ː / from Latin mamma "breast"), a clade of endothermic amniotes distinguished from reptiles (including birds) by the possession of a neocortex (a region of the brain), hair, three middle ear bones, and mammary glands. Females of all mammal species nurse their young with milk, secreted from the mammary glands.
