MAX PLUS II CPLD design and programming software owned by Altera Corporation. Schematic capture A technique of entering CPLD design information by using a CAD (computer aided design) tool to draw a logic circuit as a schematic. The schematic can then be interpreted by design software to generate programming information for the CPLD.

â€¢ FPGA â€¢ a Field-Programmable Gate Array is an FPD featuring a general structure that allows very high logic capacity . Whereas CPLDs feature logic resources with a wide number of inputs (AND planes), FPGAs offer more narrow logic resources. FPGAs also offer a higher ratio of ip-ops to logic resources than do CPLDs.
