There is a variety of multicomponent seismology geometries in industry. This involves, for example 3C/2D, 3C/3D, 3C/4D, 4C/2D, 4C/3D, 4C/4D and 9C3D (3-component shear source recorded by 3-component sensor).

A review on multicomponent seismology: A potential seismic

Experimental Modal Analysis of Civil Engineering Structures

A magnetometer or magnetic sensor is an instrument that measures magnetism—either the magnetization of a magnetic material like a ferromagnet, or the direction, strength, or relative change of a magnetic field at a particular location. A compass is a simple type of magnetometer, one that measures the direction of an ambient magnetic field.. The first magnetometer capable of measuring the ...

One area of research in which attenuation plays a prominent role, is in ultrasound physics. Attenuation in ultrasound is the reduction in amplitude of the ultrasound beam as a function of distance through the imaging medium.

Digital Signal Processing is distinguished from other areas in computer science by the unique type of data it uses: signals. In most cases, these signals originate as sensory data from the real world: seismic vibrations, visual images, sound waves, etc. DSP is the mathematics, the algorithms, and the techniques used to manipulate these signals after they have been converted into a digital form.

PUBLICATIONS 1982. Koch, M., Seismicity and structural investigations of the Romanian Vrancea region: Evidence for azimuthal variations of P-wave velocity and Poisson's ratio, *Tectonophysics*, 90, 91 - 115, 1982. A statistical analysis of local travel times of the Romanian Vrancea seismic region is performed and reveals lateral variations of the P-wave velocity and Poisson's ratio which are ...

Contents

This study originally arose out of an e-mail discussion with Rafael Capurro at the artefactphil discussion group in 1999. I am therefore indebted to him for important impulses. Cf. Rafael Capurro's analogous article *Beiträge zu einer digitalen Ontologie (Contribution to a Digital Ontology)*, from which the present study deviates considerably in both content and scope of presentation.

The next prominent seismic activity occurred on 15 and 19 April 2013. The earthquakes had M L of 3.0 and 2.9, respectively, and neither were part of a VT string. The last time isolated VT earthquakes occurred was 28 June and 9 October 2011.
