Site is one of EPA's three main watershed methods/tools/data websites: healthy watersheds, recovery potential, and watershed index online, under watershed analysis Drupal resource directory.

Healthy Watersheds Protection | US EPA

In vascular plants, the root is the organ of a plant that typically lies below the surface of the soil. Roots can also be aerial or aerating, that is, growing up above the ground or especially above water. Furthermore, a stem normally occurring below ground is not exceptional either (see rhizome). Therefore, the root is best defined as the non-leaf, non-nodes bearing parts of the plant's body.

Despite our best intentions, we've created a system of special education based on deficits. To fashion an environment in which students with special needs can achieve their fullest potential, we need to dig deep into the roots of special education and, at the bedrock level, replace its disability paradigm with a belief system based on diversity. ...

First, Discover Their Strengths - Educational Leadership

Innovation leadership is a philosophy and technique that combines different leadership styles to influence employees to produce creative ideas, products, and services. The key role in the practice of innovation leadership is the innovation leader. Dr. David Gliddon (2006) developed the competency model of innovation leaders and established the concept of innovation leadership at Penn State ...
