SRF (Self-Resonant Frequency) The frequency at which the inductor's distributed capacitance resonates with the inductance. It is at this frequency that the inductance is equal to the capacitance and they cancel each other.

Inductors & Coils - Token Components

The short line approximation ignores capacitance of the transmission line and models the resistance and reactance of the transmission line as a simple series resistor and inductor.

Voltage regulation - Wikipedia

An induction motor or asynchronous motor is an AC electric motor in which the electric current in the rotor needed to produce torque is obtained by electromagnetic induction from the magnetic field of the stator winding. An induction motor can therefore be made without electrical connections to the rotor. An induction motor's rotor can be either wound type or squirrel-cage type.

Induction motor - Wikipedia

Return to Categories. Waterhammer - Parts 1 & 2. This waterhammer tutorial looks at the subject from a different perspective than does my earlier one.
