The Dust Bowl exodus was the largest migration in American history within a short period of time. Between 1930 and 1940, approximately 3.5 million people moved out of the Plains states; of those, it is unknown how many moved to California. In just over a year, over 86,000 people migrated to California.

Asian Dust (also yellow dust, yellow sand, yellow wind or China dust storms) is a meteorological phenomenon which affects much of East Asia year round but especially during the spring months. The dust originates in the deserts of Mongolia, northern China and Kazakhstan where high-speed surface winds and intense dust storms kick up dense clouds of fine, dry soil particles.

China is building at least one new coal-fired power plant every week and has a seemingly limitless appetite for coal. The Powder River Basin in southeast Montana and northeast Wyoming has a seemingly limitless supply.. There is increasing interest linking this supply with Asian demand through west coast coal terminals.
