I think e-procurement and all activities that involve( like e-informing, e-tendering, e-auctioning, etc.) should count as a subset of e-governance, however they are using mostly in private sector.

### **Understanding e-Governance for Development | Request PDF**

E-government is a form of e-business in governance and refers to the processes and structures needed to deliver electronic services to the public (citizens and businesses), collaborate with business partners and to conduct electronic transactions within an organisational entity.

### **E-Governance and Developing Countries**

A critical pre-condition in successful e-governance for development is an e-champion or small group of e-champions: leaders with vision who put e-governance onto the agenda and make it happen. Cases like those described above show that such leadership can smash through many operational barriers.
