

eco efficiency the business pdf

Although eco-efficiency is a rather new method, the idea is not. In the early 1970s Paul R. Ehrlich and John Holdren developed the lettering formula $I = PAT$ to describe the impact of human activity on the environment. Furthermore, the concept of eco-efficiency was first described by McIntyre and Thornton in 1978, but it wasn't until 1992, when the term was formally coined and widely ...

Eco-efficiency - Wikipedia

Using spray technology to wet the fabrics in washing machines creates a chain reaction: less water, which means less energy needed to heat the water, and with new detergents that interact at lower temperatures, a final result that adds up to considerable savings in energy.

Eco-innovation - European Commission

Green building (also known as green construction or sustainable building) refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition. This requires close cooperation of the contractor, the architects, the ...

Green building - Wikipedia

The following nationwide resources are provided by eco-efficiency to assist companies and families with recycling and donation of unwanted goods. A listing of general and specific resources to donate and recycle.
