Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

14th Annual Demographia International Housing Affordability Survey (2017: 3rd Quarter) B We agree. Apart from the median multiple being simple and useful, it is also the only measure out there for purposes of international comparison.

Demographia International Housing Affordability Survey: 2018

International economics is concerned with the effects upon economic activity from international differences in productive resources and consumer preferences and the international institutions that affect them. It seeks to explain the patterns and consequences of transactions and interactions between the inhabitants of different countries, including trade, investment and migration.
