Abstract. We evaluate the capacity of a free space optical link under the influence of various atmospheric conditions and turbulence levels. Also the effect of aperture averaging on the capacity is investigated.

Unit 11 : Atmospheric Pollution -5- www.learner.org Figure 2. Processes related to atmospheric composition Courtesy United States Climate Change Science Program (Illustrated by P. Rekacewicz). Air pollution trends are strongly affected by atmospheric conditions such as temperature, pressure, and humidity, and by global circulation patterns.

Effect of Coating Weight (Mass) on Product Life Although the corrosion rate can vary considerably depending on the environmental factors, it is well known that, in most instances, the life of the zinc coating is a linear function of coating weight (mass) for any specific environment.

PLASMA SURFACE MODIFICATION OF POLYMERS USING ATMOSPHERIC PRESSURE DISCHARGES\*

Rajesh Dorai 1 and Mark J. Kushner 2 University of Illinois 1 Department of Chemical Engineering 2 Department of Electrical and Computer Engineering Urbana, IL 61801 e-mail: dorai@uiuc.edu

### **PLASMA SURFACE MODIFICATION OF POLYMERS USING ATMOSPHERIC**

Due to the fact that many definitions of standard temperature and pressure differ in temperature significantly from standard laboratory temperatures (e.g., 0 °C vs. ~25 °C), reference is often made to "standard laboratory conditions" (a term deliberately chosen to be different from the term "standard conditions for temperature and pressure", despite its semantic near identity when interpreted literally).
