Economic planning is a mechanism for the allocation of resources between and within organizations which is held in contrast to the market mechanism. As an allocation mechanism for socialism, economic planning substitutes factor markets for a direct allocation of resources within a single or interconnected group of socially-owned organizations.. There are various forms of economic planning.

Logistics is generally the detailed organization and implementation of a complex operation. In a general business sense, logistics is the management of the flow of things between the point of origin and the point of consumption in order to meet requirements of customers or corporations. The resources managed in logistics can include physical items such as food, materials, animals, equipment ...
