Audiometry (from Latin: *audire*, "to hear" and *metria*, "to measure") is a branch of audiology and the science of measuring hearing acuity for variations in sound intensity and pitch and for tonal purity, involving thresholds and differing frequencies. Typically, audiometric tests determine a subject's hearing levels with the help of an audiometer, but may also measure ability to discriminate ...

### **Audiometry - Wikipedia**

Auditory processing disorder (APD), also known as central auditory processing disorder (CAPD), is an umbrella term for a variety of disorders that affect the way the brain processes auditory information. Individuals with APD usually have normal structure and function of the outer, middle, and inner ear (peripheral hearing).

Singled Sided Hearing Loss in Children What is the effect of single sided hearing loss on my child's function and development? Traditionally, physicians and audiologists have been taught that if one ear is normal then auditory, speech, and language function and development will be normal. We now know this long-held belief is WRONG.

Hypothermia (core temperature < 35.0 °C) and hyperthermia (core temperature > 40.5 °C) are medical emergencies.. Severely hypothermic patients are at risk of cardiac arrhythmias, including atrial and ventricular fibrillation. The clinical feature that best differentiates heat stroke from heat exhaustion is a change in mental status.
