The term "group dynamics" refers to the interactions between people who are talking together in a group setting. Group dynamics can be studied in business settings, in volunteer settings, in classroom settings, and in social settings. Any time there are three or more individuals interacting or talking together, there are group dynamics.

the material of Chapter 2 (Example 2.32). The third approach to dynamic optimization extends the Lagrangean technique of static optimization to dynamic problems. Consequently, we call this the Lagrangean approach. A rigorous treatment of dynamic optimization (especially optimal control theory) is quite difficult.
