Essentialism is the view that every entity has a set of attributes that are necessary to its identity and function. In early Western thought Plato's idealism held that all things have such an "essence" – an "idea" or "form". In Categories, Aristotle similarly proposed that all objects have a substance that, as George Lakoff put it "make the thing what it is, and without which it would be not ...

Essentialism - Wikipedia

In contemporary education, mathematics education is the practice of teaching and learning mathematics, along with the associated scholarly research.. Researchers in mathematics education are primarily concerned with the tools, methods and approaches that facilitate practice or the study of practice; however, mathematics education research, known on the continent of Europe as the didactics or ...

Although there is evidence that character / essential life skills in childhood are associated with a range of positive outcomes at school and beyond, much less is known about how these skills can be developed and whether they lead to increased academic attainment. Few robust studies in the UK have ...

Character & essential life skills | Education Endowment

In the last 60 years, the use of the notion of category has led to a remarkable unification and simplification of mathematics. Conceptual Mathematics, Second Edition, introduces the concept of 'category' for the learning, development, and use of mathematics, to both beginning students and general readers, and to practicing mathematical scientists.
