The Outlook for Energy is ExxonMobilâ€™s global view of energy demand and supply through 2040. We use the data and findings to help guide our long-term strategies and investments. It also highlights the dual challenge of ensuring the world has access to affordable and reliable energy supplies to support prosperity while reducing environmental impacts â€“ including the risks of climate change.

Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which then communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics [why?] of ...
