Gas chromatography–mass spectrometry (GC-MS) is an analytical method that combines the features of gas-chromatography and mass spectrometry to identify different substances within a test sample. Applications of GC-MS include drug detection, fire investigation, environmental analysis, explosives investigation, and identification of unknown samples, including that of material samples obtained ...

The Oklahoma Geological Survey does not have a database for oil and gas production and well data for the state of Oklahoma. Public access to these data is provided by the Oklahoma Corporation Commission, although these data are not complete. The most complete sources of data are available from pay-for-use providers such as Oil Law Records and IHS Energy.
