Explore bending of light between two media with different indices of refraction. See how changing from air to water to glass changes the bending angle. Play with prisms of different shapes and make rainbows. Explain how light bends at the interface between two media and what determines the angle ...

of refraction of the two mediums are given. 6. Use the Law of Reflection and the Law of Refraction to fill out the following table (copied into your lab notebook), in which the angle of incidence is set and you are calculating the angle of reflection (r_{fi}) and the angle of refraction (r_{fr}). 7. Test out your predictions using the simulation.

A summative quiz and answer key can be found in Appendix B. As an alternative assessment, the teacher may wish to have students measure the index of refraction of additional substances listed in the lab document.

Refraction Action Lesson - CEBC

Refraction of Light II . Introduction. This laboratory was designed to investigate the behaviour of light as it travels through a denser into a less dense medium. Materials. Ray Box with comb; Semicircular plastic block; Procedure: Placed the semicircular plastic block on the centre of a blank sheet of paper.

Refraction of Light Lab Answers – SchoolWorkHelper

o refraction o index of refraction Note: Angles of incidence and refraction are read WITH RESPECT TO THE NORMAL. On the diagram below, label the angle of incidence (i) and the angle of refraction (r). Hypothesis: Predict what will happen to the size of the angle of refraction as the media through which the ray is refracting becomes denser.
