The FAIR Institute is a non-profit professional organization dedicated to advancing the discipline of measuring and managing information risk. It provides information risk, cybersecurity and business executives with the standards and best practices to help organizations measure, manage and report on information risk from the business perspective.

## **Quantitative Information Risk Management | The FAIR Institute**

Risk Management is the process of identifying risk, assessing risk, and taking steps to reduce risk to an acceptable level. Organizations use risk assessment, the first step in the risk management methodology, to determine the extent of the potential threat, vulnerabilities, and the risk associated with an information technology (IT) system.
