Visually, there are three distinct sections of the script. First, there is a base level with no indentation where libraries are included in the script through @load and a namespace is defined with module. This is followed by an indented and formatted section explaining the custom variables being provided (export) as part of the script's namespace.

Plutonium is a radioactive chemical element with symbol Pu and atomic number 94. It is an actinide metal of silvery-gray appearance that tarnishes when exposed to air, and forms a dull coating when oxidized. The element normally exhibits six allotropes and four oxidation states. It reacts with carbon, halogens, nitrogen, silicon and hydrogen. When exposed to moist air, it forms oxides and ...
