Formally stated, Newton's third law is: For every action, there is an equal and opposite reaction. The statement means that in every interaction, there is a pair of forces acting on the two interacting objects. The size of the forces on the first object equals the size of the force on the second object.

**Newton's Third Law**

Newton's third law of motion states that for every action there is an equal and opposite reaction. o When one object exerts a force on a second object, the second object exerts an
