Abstract. Based on the methods outlined in Determining the Ark Kinds (Lightner et al. 2011), information on the class Mammalia was evaluated in an attempt to get a realistic estimate of what mammalian kinds would have been represented on the Ark. Examining information on extant species (those alive today), it was estimated that they represent 137 created kinds.

A serial killer is typically a person who murders three or more people, usually in service of abnormal

psychological gratification, with the murders taking place over more than a month and including a significant period of time between them. Different authorities apply different criteria when designating serial killers. While most set a threshold of three murders, others extend it to four or ...
