

### **physics skill and practice pdf**

During the Renaissance, as scientists began to develop the ideas of physics and chemistry, they needed better units of measurements to communicate scientific data more efficiently. Scientists such as Kepler, Galileo, and Newton needed to prove their ideas with data based on measurements that other scientists could reproduce.

Name: Date: Potential and Kinetic Energy 3.2 Potential energy is stored energy. The formula for the potential energy of an object is: where  $m$  equals mass in kilograms,  $g$  is the acceleration of gravity, and  $h$  equals the height of the object. The mass ( $m$ ) of the object times the acceleration of gravity ( $g$ ) is the same as the weight of the object in newtons. The
