About the I-PSS The International Prostate Symptom Score (I-PSS) is based on the answers to seven questions concerning urinary symptoms and one question concerning quality of life.

International Prostate Symptom Score (I-PSS)

Prostate cancer is the development of cancer in the prostate, a gland in the male reproductive system. Most prostate cancers are slow growing; however, some grow relatively quickly. The cancer cells may spread from the prostate to other area of the body, particularly the bones and lymph nodes. It may initially cause no symptoms. In later stages, it can lead to difficulty urinating, blood in ...

What is the prostate? The prostate is a walnut-sized gland that only men have. It is part of the reproductive system that makes the fluid that carries sperm.

Prostate Cancer Screening - Us Too

Prostate cancer is a disease in which malignant (cancer) cells form in the tissues of the prostate. The prostate is a gland in the male reproductive system. It lies just below the bladder (the organ that collects and empties urine) and in front of the rectum (the lower part of the intestine). It is about the size of a walnut and surrounds part of the urethra (the tube that empties urine from the ...

Prostate Cancer Treatment (PDQ®) – Patient Version

The American Cancer Society, along with other leading medical organizations, recommends informed decision-making when it comes to screening for prostate cancer. This means each man should make his own decision, along with his medical care providers, about whether to be screened.

Nutrition Guide for Men with Prostate Cancer

Prostate cancer is the most common noncutaneous cancer in men in the United States. An estimated one in six white men and one in five African-American men will be diagnosed with prostate cancer in their lifetime, with the likelihood increasing with age.

Prostate Cancer Workup: Approach Considerations, Prostate

The immune system is a complex network of cells, tissues, organs, and the substances they make. It helps the body fight infections and other diseases. White blood cells, or leukocytes, play the main role in immune responses. These cells carry out the many tasks required to protect the body against disease-causing

microbes and abnormal cells.

Biological Therapies for Cancer - National Cancer Institute

Movember (a portmanteau of the Australian-English diminutive word for moustache, "mo", and "November") is an annual event involving the growing of moustaches during the month of November to raise awareness of men's health issues, such as prostate cancer, testicular cancer, and men's suicide. The Movember Foundation runs the Movember charity event, housed at Movember.com. The goal of Movember ...
