I wrote about the GPS Origins test from DNA Diagnostics Center back in August this year when the test was first launched. There was recently a special offer via Geneabloggers to upload your raw data and receive an interpretation for \$29, a big saving on the usual transfer price of \$79. I thought I would give it a try out of curiosity. As a comparison three other people with different ...

Compared with other regions, notably Africa and the Americas, the national HIV prevalence levels in East Asia are very low (0.1% in the adult (15-49) group). However, due to the large populations of many East Asian nations, this low national HIV prevalence still means that large numbers of people are living with HIV.
