

transport moving to climate pdf

Transportation contributes to roughly a fifth of greenhouse gas emissions, and as a growing sector of the economy, its contribution to climate change, if remained unchanged, could even grow.

Transport Moving to Climate Intelligence | SpringerLink

This book describes the challenge that transport constitutes today as well as its role in the future for climate policy. It will discuss and provide hands-on suggestions for transportation policy that will mitigate the greenhouse gas emissions from transport. The book is organized into five parts.

Transport Moving to Climate Intelligence - New Chances for

Please check this box if you have no corrections to make to the PDF file Effective climate change mitigation necessitates, inter alia, the decarbonization of the transport sector (IPCC, 2014; 52 ...

Transport Moving to Climate Intelligence: New Chances for

Transportation both contributes to and will be impacted by climate change. While mitigating transportation contributions to greenhouse gas emissions and adapting to climate impacts on the transportation system are equally important for the transportation sector to address, this plan addresses adaptation work only.

U.S. Department of Transportation Climate Adaptation Plan

Freight Transport and Climate Change – Exposures and Opportunities Page 5 The transport sector is the second fastest growing source of Australian greenhouse gas emissions.¹ Whilst the majority of transport emissions are associated with personal travel, the growth of emissions from freight transport far exceeds that of personal travel.

Freight Transport and Climate Change: Freight Transport and

– If climate change continues unabated and as rapidly as a few models predict, saving at least some species will require solutions more radical than creating parks and shielding endangered species from bullets, bulldozers, and oil spills: It will require moving them.

BioTransport: Moving Wildlife in Response to Climate

Hence, social and economic resiliency depends on adapting transport systems to better withstand climate impacts. A vulnerable transport sector will face high costs for maintenance and repair; reduce community access to jobs, schools, and hospitals; and potentially lead to heavy economic losses.

Transport at COP21: Part of the Climate Change Solution
