This page shows the procedure for predicting whether mixing two aqueous solution of ionic compounds will lead to a precipitation reaction and show s you how to write complete and net ionic equations for the reactions that take place. T he following is a typical problem.. Predict whether a precipitate will form when water solutions of silver nitrate, AgNO_3 (aq), and sodium sulfide, Na_2S (aq) ...

In elementary algebra, completing the square is a technique for converting a quadratic polynomial of the form $ax^2 + bx + c$ to the form $a(x-h)^2 + k$ for some values of h and k . Completing the square is used in solving quadratic equations,; graphing quadratic functions,; evaluating integrals in calculus, such as Gaussian integrals with a linear term in the exponent,; finding Laplace transforms.

Suppose we wish to complete the square for the expression $3x^2 + 9x + 50$. We begin by factoring out the coefficient of x^2 , in this case 3. It does not matter that 3 is not a factor of 50; we can still do this by writing the expression as

In physics, the Lorentz transformations are a one-parameter family of linear transformations from a coordinate frame in space time to another frame that moves at a constant velocity, the parameter, within the former. The transformations are named after the Dutch physicist Hendrik Lorentz. The respective inverse transformation is then parametrized by the negative of this velocity.
