## Wireshark Lab 2 Solutions

**wireshark lab: getting started - ustc** - figure 2: wireshark graphical user interface the wireshark interface has five major components: • the command menus are standard pulldown menus located at the top of the window. of interest to us now are the file and capture menus. the file menu allows you to save captured packet data or open a file containing previously **wireshark lab#1 solution** - □□□□□□ □□□□□□ - wireshark lab#1 solution answers were taken from students with correct lab reports and show what should be the ideal format of your lab report. 1. list the different protocols that appear in the protocol column in the unfiltered packet-listing window in step 7 above. answer: **lab 1: packet sniffing and wireshark - computer science** - lab 1: packet sniffing and wireshark introduction the first part of the lab introduces packet sniffer, wireshark. wireshark is a free open-source network protocol analyzer. it is used for network troubleshooting and communication protocol analysis. wireshark captures network packets in real time and display them in human-readable format. **wireshark http v6 - marmara Üniversitesi** - ethereal-trace-1. the traces in this zip file were collected by wireshark running on one of the author's computers, while performing the steps indicated in the wireshark lab. once you have downloaded the trace, you can load it into wireshark and view the trace using the file pull down menu, choosing open, and then selecting the http-ethereal ... **solution to wireshark lab: ethernet and arp - iut** - solution to wireshark lab: ethernet and arp fig. 1 get request ethernet information 1. what is the 48-bit ethernet address of your computer? ... running wireshark, and the arp reply sent to the computer running wireshark by the computer with the arp-requested ethernet address. but there is yet another 1. **capturing and analyzing ethernet frames** - since this lab is about ethernet and arp, we are not interested in ip or higher-layer protocols so change wireshark's "listing of captured packets" window so that it shows information only about protocols below ip. to do this, select analyze ->enabled protocols. then uncheck the ip box and select ok. you should now see a wireshark window ...
